HITESH KUMAR

Frontend Engineer | React.js | TypeScript | AI Applications

9036148474 | hitesh.kr.8996@gmail.com | Bengaluru, India 560037 | hikuresume.netlify.app

SUMMARY

Frontend Engineer with 7+ years of software development experience specializing in React.js, TypeScript, modern frontend architecture, REST API integration, and AI-powered applications. Experienced in enterprise conversational AI using RAG, LLM-backed APIs, vector databases, WebSockets, and real-time streaming. Strong in responsive, reusable, cross-browser UI development, authentication, role-based access, analytics, and enterprise workflows.

SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap

UI & Components: shadcn/ui, Responsive UI, Reusable Components, Component Architecture, Cross-Browser Development

State Management: Redux, Redux-Saga

API & Data: REST APIs, Axios, TanStack Query (React Query)

Forms & Validation: React Hook Form, Zod

Real-Time: WebSockets, Streaming Responses, Agentic Communication

AI Integration: RAG, LLM Integration, Vector Databases, AI Application UI, Context-Aware Responses

Authentication: MSAL, Role-Based Access Control (RBAC)

Visualization & Tools: Recharts, Git, CVS, Postman, VS Code, SQL Developer

EXPERIENCE

Cognizant Technology Solutions — Associate | Bengaluru, India | November 2023 – Present

- Engineered the frontend for an AI-powered enterprise conversational application using React.js and TypeScript, integrating RAG over internal organizational data with LLM-backed APIs and vector-database retrieval.
- Developed real-time agentic communication using persistent WebSockets, supporting streamed responses, long-running execution, stop/cancel interactions, and UI lock/unlock states; added voice interaction over WebSockets.
- Integrated REST APIs using Axios and TanStack Query for chat, history, reports, templates, notifications, access requests, and user management.
- Built interfaces for backend reasoning traces and rich AI output including Markdown, code snippets, tables, and structured data.
- Developed an enterprise report-generation workflow with dynamic templates, rich-text editing, document/file upload and processing, and backend report APIs.
- Implemented template management covering library states, sharing, access requests, approval/rejection, cloning, locking, and role-based operations.
- Implemented MSAL authentication and session workflows with role-based UI behavior for Standard, Superuser, BPO, and Product Owner users.
- Contributed to an admin analytics dashboard using Recharts for unique/active users, invocation trends, and token usage.
- Built responsive desktop, tablet, and mobile UIs using React.js, TypeScript, Tailwind CSS, SCSS, and shadcn/ui; contributed to shared UI components across applications.

Tata Consultancy Services — Software Engineer | Bangalore, India | May 2021 – November 2023

- Developed user-facing React.js features for enterprise applications supporting North American clients including PwC, Howmet Aerospace, and Arconic Inc.
- Built reusable UI features with emphasis on maintainability and consistency; investigated and resolved UI defects across application screens.
- Collaborated with cross-functional teams to understand requirements, troubleshoot issues, and deliver enhancements in an Agile environment.

Tata Consultancy Services — Assistant System Engineer | Bangalore, India | July 2019 – May 2021

- Supported enterprise production applications by troubleshooting issues affecting data integrity, functionality, and performance.
- Resolved production incidents and service requests using SQL and Unix commands; monitored server alerts and application health.
- Analyzed user-reported problems, investigated root causes, and proposed effective technical solutions.

Varistor Technology — Software Developer Intern | Bangalore, India | February 2019 – April 2019

- Developed e-commerce Android application components using Java, Android Studio, JSON, and XML.
- Implemented features following development standards; debugged application issues and maintained project documentation.

SELECTED PROJECTS

Insight Agent — AI-Powered Conversational & Enterprise Productivity Application | April 2024 – Present

Technologies: React.js, TypeScript, Tailwind CSS, SCSS, shadcn/ui, Redux/Redux-Saga, TanStack Query, React Hook Form, Zod, Axios, MSAL, Recharts, WebSockets

- Built responsive real-time chat with history retrieval, search, date filtering, and newest/oldest sorting.
- Integrated RAG-based context-aware responses using internal organizational data, LLM services, and vector-database retrieval, with streaming and stop/cancel controls.
- Implemented rendering of reasoning traces and complex AI output including Markdown, code blocks, tables, and structured data.
- Delivered template-driven report generation with rich-text editing and file upload/processing, plus WebSocket-based voice interaction.

Worbrain – Attendance and Payroll Management — Tata Consultancy Services

Technologies: React.js, SQL

- Contributed to attendance and payroll workflows covering employee balances, accruals, punches, and payroll; supported tabular/graph reporting.
- Contributed to duplicate-user handling and clock-punch authentication based on scheduled shift timings in an Agile environment.

GOMO E-Learning Course — Tata Consultancy Services

Technologies: GOMO Authoring Tool

- Designed and developed interactive e-learning content following instructional design practices.

Visible Console — Cognizant Technology Solutions

Technologies: React.js

- Implemented line-lock behavior for lapsed accounts, tax calculation highlighting, timezone handling, and payment-option modal fixes.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science Engineering — CMR Institute of Technology, Bangalore | June 2019 | GPA: 7.2

Intermediate — St. Karen's Secondary School, Patna | March 2014 | 71.5%

CERTIFICATIONS

- Deploy Gemini Enterprise with Workspace Data Sources and Model Armor — Google
- Govern Agent Access with Gemini Enterprise Agent Platform — Google

LANGUAGES

English — Full Professional Proficiency | Hindi — Full Professional Proficiency
